**We are innovation rebels:
permanent beta.** — Sven Erni, Co-Founder

**An Idea, no matter how silly
it may sound, drives thinking.
Thinking inspires change.**

— Jeffrey Ibañez, Co-Founder

ACOUSTIC ADVISORY

The elements used to optimize acoustic well-being must have the right performance and support your design intent whether classic or modern, purist or opulent, with subtle touches or bold colours, discreet or eye-catching. We help you to solve acoustic challenges while meeting your design goals and budget.

PLANNING + NESTING OPTIMIZATION

In the design phase, too little attention is paid to the efficient planning of our material. A high level of cutoffs automatically results in increased cost of the same magnitude and environmental damage. We use specialized tools to help you minimize material wastage in your projects through optimized cutting plans according to your specifications.

PARAMETRIC DESIGN

We do not draw but program your unique ideas. This approach delivers unique and sophisticated designs that perfectly meet your requirements. We combine unique expertise in the field of computational-aided design and of digital manufacturing with a deep understanding of the craftsmanship and knowledge of materials. We create unique designs according to your ideas and budget.

PROTOTYPING & DIGITAL MANUFACTURING

We help you develop prototypes into a tangible working product across industries. We combine the latest technology and high-precision cutting centres with a wide knowledge of highly qualified application engineers and product designers who have amassed expertise across a broad range of industries. Getting IMPACT ACOUSTIC® involved at the beginning accelerates the process of a new design project.

chatpod 185
POD SYSTEM

chatpod

97% POST-CONSUMER CONTENT
100% RECYCLABLE

100% CIRCULAR

We up-cycle materials to build our pods and recycle them again later. Our entire facility is heated and our machines are powered by clean smart energy.

100% SOCIAL

Chatpod® is a great tool for companies that take corporate social responsibility seriously. We value and promote equality within our team. The pods are manufactured in the Swiss Alps together with handicapped professionals.

SAWDUST

Chatpod®'s frames are made of sawdust. A powdery particle of wood, a by-product from saw mills. Compressed through high pressure and heat without resin, making it highly recyclable and environmentally friendly.

CARDBOARD

Chatpod®'s body is made out of recycled cardboard. Cardboard is an extremely pressure resistant, rigid, dimensionally stable and most environmentally effective material to recycle, since the fibre in the cardboard has already been processed.

PET BOTTLES

The acoustic exterior and interior cladding is made of up-cycled PET bottles. The open and highly compressed felt like structure is more effective than conventional acoustic composites.

RECYCLED RUBBER

Chatpod®'s thin layer of sound proof lining is made of recycled rubber. This layer ensures the minimum sound transfer from within and outside the pod. An organic material with flame retardant composition.

DATA SHEET

ARCHISONIC® 12 mm

Dimensions: 1200mm x 2800mm

Composition: 100% PET (min. 60% post-consumer)

Density: 2400g/m²

Thickness: 12mm (+/-7%)

Fire test:
DIN EN 13501-1 B-s1, d0
ASTME84 Class A

VOC Emission:
CDPH 01350 Pass
ISO 16000 (CDPHP/EHLB/Standard Method V1.2.)
EN 16516

Environmental: Cradle to Cradle Certified Product qualifies for LEED v4 specifications on VOC emissions in LEED EQ credit (Low-emitting products)

Colour Fastness:
EN ISO 105-B02, A1 Grade 6

Material reutilisation: 53 PET Bottles/m²

Sound absorption
DIN EN ISO 11654 aw 0.30 (no air gap)

Sound Absorption Class: A

Supported by:

COLOUR & SURFACE DEVIATION

ARCHISONIC® is manufactured at the highest quality standards, yet slight color and surface deviations caused by the high degree of recycled fiber are an inevitable part of the product characteristics and do not claim warranty services - it is the natural and less manicured look that designers appreciate about this product around the world. Irregularities are best visible in our light color products.

VOC Emission:
CDPH 01350 Pass
ISO 16000 (CDPHP/EHLB/Standard Method V1.2.)
EN 16516

Environmental: Cradle to Cradle Certified Product qualifies for LEED v4 specifications on VOC emissions in LEED EQ credit (Low-emitting products)

Colour Fastness:
EN ISO 105-B02, A1 Grade 6

Material reutilisation: 88 PET Bottles/m²

Sound absorption
DIN EN ISO 11654 aw 0.55 (no air gap)
aw 0.65 (50mm)
aw 0.90 (100mm)
aw 0.95 (200mm)
aw 0.95 (300mm)

Sound Absorption Class: A

Supported by:

COLOUR & SURFACE DEVIATION

ARCHISONIC® is manufactured at the highest quality standards, yet slight color and surface deviations caused by the high degree of recycled fiber are an inevitable part of the product characteristics and do not claim warranty services - it is the natural and less manicured look that designers appreciate about this product around the world. Irregularities are best visible in our light color products.

**BESPOKE ACOUSTIC ROOM DIVIDERS.
MULTINATIONAL PROFESSIONAL SERVICES FIRM.**

Every project is unique. We work with architects and designers to create bespoke acoustic solutions in line with the design concept and budgetary requirements.
