Outrack

Outrack

by Joana Bover | 2023

El carril Outrack es un sistema de perfiles electrificados a 24V apto para exterior e interior, que te permite instalar tus luminarias allí donde las necesites.

La idea de este carril nació de la necesidad que con frecuencia tenemos de instalar temporalmente, nuestras luminarias en ambientes de exterior que, con la llegada del buen tiempo, nos invitan a salir y disfrutar de nuestro entorno.

Outrack is a 24V track profiling system suitable for both the indoors and outdoors, enabling you to install it's luminaires wherever required.

The idea behind this track lighting system stemmed from a frequent need to install luminaires in outdoor environments. Outrack's jack mounted luminaires can be quickly disconnected, when required, especially in the event of extreme weather conditions.

En el carril Outrack podemos instalar una amplia gama de productos de Bover y recogerlos cuando nos conviene, sin tener que desmontar la instalación eléctrica. Con mucha facilidad, podremos guardar nuestras lámparas, siempre que queramos.

Los perfiles están disponibles en 3 tamaños y se pueden conectar entre ellos a través de un cable conector o una unión lineal. Las luminarias colgantes, pueden instalarse en el carril o podemos desplazarlas fuera de él, lo que nos permite un mayor margen de posicionamiento en nuestras instalaciones.

A wide range of Bover products can be installed on the Outrack track and gathered up again when needed, without having to disassemble the electrical facility. With a simple click, you can store your lights whenever you want.

Profiles are available in three sizes and can be interconnected via a connector cable. Pendant luminaires can be installed on the track or moved beyond it, which allows for a greater positioning margin in your facilities.

1 Perfiles / Profiles

Es un sistema de perfiles electrificados para exterior e interior IP65. Conectores de seguridad IP67. Se fabrica en tres longitudes y dispone de distintos accesorios de fijación y conexión según la necesidad de cada proyecto.

Podemos instalar una amplia gama de luminarias a 24V (2400k).

This is an electrified profiling system for the indoors and outdoors (IP65). It comes with IP67 safety connectors. Made in three lengths, it has different fixing and connection accessories to suit each project. A wide range of 24V (2400K standard / 2700 and 3000 available upon request) luminaires can be used.

Todos los conectores de OUTRACK incorporan tapones de cierre y junta. Así podemos garantizar que en el caso de que un conector no se use, estos queden protegidos contra el agua y garantizar el IP.

¡Le recomendamos que guarde estos tapones!

All OUTRACK connectors feature joint and stopping plugs. Thus, if a connector is unused, this guarantees they are protected against water and the IP is maintained.

Remember to keep those plugs!

Importante!

Las luminarias se suministran con 2 mts de cable y el conector de conexión sin instalar, siga los puntos de instalación del apartado de sistema de 24V (luminarias) de las instrucciones de montaje. Si requiere de longitudes de cable distintas disponemos de la opción bajo demanda de medidas de 3mts y 6mts, la longitud puede ser adaptada por el usuario cortando el cable a medida.

Important!

Luminaires are supplied with 2m of cable and connectors. Follow installation points in the 24V system section (luminaires) in the assembly instructions. For longer cable lengths, 3m and 6m lengths are available on request. Cable length can be cut to size on site.

(W) Potencia / *Power*
(m / feet) Longitud / *Total Length*

Outrack 24V Cable 2 x 1,5 mm de sección (AWG16)

Tabla de caídas de tensión por m/l en función del consumo, pérdidas estimadas 5%.

Utilice la tabla para calcular el consumo y longitud máxima de la instalación, para poder ubicar correctamente las fuentes de 24V de alimentación del perfil Outrack.

En Bover solo disponemos de fuentes de alimentación de 24V de 60 y 96 W (regulable triac o 0/10V).

Para potencias superiores póngase en contacto con el departamento técnico de la empresa.

Solo utilice fuentes de alimentación de 24V homologadas para la instalación y no sobrepase en ningún caso los límites del máximo de esta.

Outrack 24 V Cable 2 x 1.5 mm section (AWG16)

Table of voltage drops per foot depending on the total consumption, with an estimated loss of 5%.

Use the table to calculate the fixtures consumption and maximum length in order to correctly position the 24V power supplies of the Outrack profile.

At Bover we only have 24V power supplies of 60 and 96 W (adjustable TRIAC or 0/10 V).

For higher powers, contact the company's Technical Department.

Only use 24V power supplies that have been approved for the installation and do not exceed its maximum limits under any circumstances.
