Wick

Wick is a portable lamp designed with the belief that light is meant to be shared: it is a connecting tool that humanises moments of our lives. Creating a place to gather, Wick is designed to be a companion. It is along for adventures, creating ambiance and togetherness, serving as candlelight for the modern era.

Timeless and practical, Wick adapts to a broad variety of contexts, from an intimate home to a bustling restaurant patio, to a romantic evening picnic. With intentional emphasis on making the everyday special, Wick is a heart-warming answer to the moment.

Wick is a call from our past to our future, it's the opportunity to mindfully light these moments.

Available Colors:
Brass, Graphite, Black and White

Wick S

Leveraging the same design language and features, Wick S is slightly lower in its profile for more versatility. Whether you are new to the Wick family or looking to layer Wick S with your existing Wicks to create more dimension, we are excited to expand on this beautiful Graypants product.

Available colors:
Brass, Graphite and Black

Barro

In an exploration of new materials and mediums, Graypants launches Barro. Designed by Caterina Moretti and made in Oaxaca, Mexico, the pendant is made from clay pulled directly from the earth. Each shade is crafted and finished with only the power of heat and smoke, and layered with handblown glass. The Barro pendant lamps represent the conjunction of craft and innovation, using traditional techniques to create a modern, unique shape. Incredibly versatile, Barro integrates easily to elevate its surroundings – over a dining table or kitchen island, dotted over a bar in a restaurant or welcoming you in a lobby space.

Barro is created using an ancient, region-specific process. It begins with gathering earth from the surrounding areas of Oaxaca to make the clay. Water is added to slake the clay and create slip, which is then poured into handmade plaster molds. The clay pieces are each hand burnished before firing with the help of a river stone, to achieve an iridescent color and smooth feel. To highlight the ceramic element and the markings made by flame, we added a blown glass shade that envelops and protects it.

Available Colors:
Natural Clay Clear Glass and Charcoal Clay Smoke Glass.

Scraplights

It all started with Scraplights. Sourcing post-consumer recycled cardboard and turning it into warm, diffused light. Scraplights is our signature series, one we continue to evolve and love. They are now available in the colors Natural, Blonde and White.

Skew is the first Scraplight sconce and the elegant addition to any Scraplight silhouette. Slim yet substantial, Skew provides a radiant glow perfect for illuminating a hallway in an office or hotel, and could be just as beautiful above bedside tables.

Scraplights

Scraplights Linear

Graypants continues to push and evolve expressions of our iconic Scraplights. Introducing Hewn, a linear shape that is as beautiful as it is hardworking. As a task light, Hewn will deliver more illumination than some of our other Scraplights expressions and the shape is very suitable over a desk, dining table or kitchen island. Hewn is handmade in Graypants' Seattle studio as well as in Amsterdam, and currently available globally.

Available Colors:
Natural, Blonde, White

With Hewn linear, Graypants adds a tactile and creative addition to a mundane field of task lighting, offering a beautiful light for all kinds of spaces. Hewn holds a texture created by cutting layers of the shade parallel to the flutes of the cardboard versus the perpendicular cut lines of our other shapes. The cutting process allows us to build something full of character, while also being opaque. Serving a wide range of brightness preferences, Hewn is dimmable and performs very well in both a home environment or commercial space. Hewn is available in three finishes and several lengths and heights.

Roest

The unpretentious simplicity of the Roest collection bends the norm of modernism. Handmade in Holland, Roest utilizes nature's reaction between iron, oxygen, water and time, and elevate any setting.

Graypants' teamed up with Dutch designer VanJoost to expand our curiosities in the world of lighting. This collaboration highlights our unique fascination with our local landscapes and material research. By combining these two principals, we were able to create a truly unique aesthetic, using the intersections of the natural world and lighting.

Available Colors:
Rust, Zinc, Rust/Zinc, Carbon

Levity

For the Levity series, we partnered with Netherlands-based Studio Truly Truly, a design studio who frames their work as a manifesto: Make things properly, honestly and artfully. Studio Truly Truly focuses on designing products that combine function with sensuality. Levity is a series of minimal and poetic flexible lights, combining a rigid metal frame with a draped textile shade.

Levity Halo Pendant

Offered in two sizes, the Levity Halo Pendant creates two different visual experiences - the smaller delivering a traditional circle shape, the larger allowing for a more dramatic draping. Resting across a metal frame, the circular light radiates through a braided nylon textile sleeve, giving a sense of softness and elegance. A LED source is enclosed within a flexible silicone tube, providing even diffusion that conceals the integrated light source. Levity creates artistic ambiance over a dining table in a residence, or makes a visual statement in an office lobby.

Levity Bow Pendant

A variation on the Levity Halo pendant, the Levity Bow Linear pendants are a commitment to effortless elegance; the powder coated metal frame holds up soft, draped light in a simple, elegant statement. Offered in two lengths - the fixtures can be layered together or used as a singular lit element.

Chrona

Mimicking the phosphorescent envelope found around stars, Chrona lights create a luminous glow by combining spun brass and diffused acrylic. With a variety of configurations in both horizontal and vertical orientations, Dish pendants can be clustered together to make stunning constellations or individually hung to accentuate any space. Thin, yet robust, the pendants are available in diameters ranging from 14 to 42 centimeters.

A 24 centimeter wall sconce and table lamp are recent additions to the collection, available in brass.

Loci

Loci is an innovative and highly customizable suspension light. Latin in origin, the name refers to the series' innovative method of achieving hundreds or thousands of singular points of light in an installation. Loci comes in five standard designs: Ring, Spiral Ring, Mobius, Rain and Wave, but any number of pendants can be used to create unique designs customized to fit your specifications. The individual pendants within each design are made of solid frosted diffusers and can also be specified in various shapes. When lit, the pendants emit a soft glow highlighting their respective designs in tandem with a powerful expression of the overall design of the installation.

The Loci suspension light works especially well in large open spaces such as building lobbies and stairwells, where the light can be customized to create imaginative installations.

Canopies

Using a canopy is the greatest way to showcase Graypants lighting products. The canopy refers to a powder coated, metal plate that allows us to group multiple pendant lights into endless clustered configurations. Whether it is a cascading array of Roest pendants, or a large grouping of Scraplight Moons in various dimensions, canopy clusters have a dramatic visual impact. Akin to sculpture, using a canopy allows us to create composition where the lights work together to create an artistic element in a space versus using singular lit elements. We offer canopies in either circular or rectangular configurations, and in various sizes therein.
